

# Are you pouring nutrition supplements down the drain?

Stop wasting time and money on powdered wound healing drinks that your patients don't consume.

Some of the reasons we hear are:

"It fills me up and then I don't want to eat."

"It makes me cough and gag."

"It is gritty and doesn't taste good."

"It makes me go to the bathroom too much."

"It gives me a stomachache."

"It takes me so long to drink it all."

## The choice is clear.

2-ounce serving size once/day

8-fluid-ounces twice/day

# Expedite™ contains a highly concentrated blend of the collagen dipeptides prolyl-hydroxyproline (PO) and hydroxyprolyl glycine (OG) to fuel collagen production.

- STEP 1: CONSUMPTION**—The 2-fluid-ounce portion is manageable for both patients and caregivers in a choice of liquid or gelatin.
- STEP 2: ABSORPTION**—Expedite is readily absorbed in the gut to reach the wound site. PO and OG can circulate in the bloodstream for more than 4 hours post-ingestion.
- STEP 3: DISTRIBUTION**—Expedite reaches the wound site with 30 times the PO and OG content when compared to standard collagen supplements.
- STEP 4: PROLIFERATION**—PO and OG accumulate in the skin where they stimulate fibroblasts to produce dermal extracellular matrix components. Expedite directly affects the proliferative stage of wound healing by stimulating receptors in fibroblasts to produce new collagen.

## PLUS L-citrulline to stimulate nitric oxide production.

L-citrulline is the more efficient and more powerful way to stimulate nitric oxide production when compared to supplemental arginine.

**Ingredients:** Water, Hydrolyzed Collagen Peptides, L-Citrulline, Malic Acid, Carrageenan and Locust Bean Gum, Natural Flavors, Potassium Citrate, L-Tryptophan, Sucralose, Potassium Sorbate and Sodium Benzoate (preservatives), Yellow 5 and 6.
